---

PROFESSIONAL SUMMARY

Experienced DevOps, Platform and Infrastructure Engineer, taking end-to-end ownership of production environments, from bare-metal and edge devices to highly available Kubernetes clusters and cloud. Specialized in AWS, Kubernetes, Helm chart design, and CI/CD pipelines (Jenkins, GitHub Actions) with GitOps automation (FluxCD, ArgoCD). Using Ansible for provisioning and k3s for air-gapped edge deployments.
Designing agentic AI systems and organizational knowledge infrastructure, including an Organizational Brain reasoning layer, an AI-awareness layer, and multi-session Claude architectures.

TECHNICAL SKILLS

Kubernetes & GitOps: CKA Certified · K3s · EKS · Helm · FluxCD · ArgoCD · KEDA · K9s
Cloud & IaC: AWS · Terraform · Terragrunt · CloudFormation · Ansible
Networking: WireGuard · CCNA · VPC · Nginx · LoadBalancing · DNS · Proxies · CDN
Security: SSO · fail2ban · Xray · IAM · Trivy
CI/CD: GitHub Actions · Jenkins · Bitbucket Pipelines · JFrog Artifactory
AI Tools: Claude (code, cowork, APIs) · Gemini (NotebookLM, APIs) · open-notebook
Agentic: n8n · Qdrant · Ollama · LangChain · Embedding Models · Agentic Workflows
Observability: Prometheus · Grafana · ECK-Stack · CloudWatch, OpenTelemetry, Jaeger
Databases: PostgreSQL · MySQL · RDS · Aurora · DynamoDB
Messaging: ActiveMQ (Artemis) · AmazonMQ · Kafka · SQS · Lambda
Languages: Python · Bash · Go · Groovy

EXPERIENCE

DevOps, Platform, Infrastructure & AIOps Engineer | Polustech
Jan 2026 – Present

- Architected an AI-Ops ingestion pipeline (n8n, S3 triggers, Qdrant RAG) with CloudWatch/DynamoDB-based confidence logging for automated RCA.
- Built a Kubernetes-native dual-LLM agent (Ollama offline / Claude Sonnet online) that autonomously monitors, self-corrects, and escalates microservice failures on field-deployed edge devices.

- Designed a multi-region AWS platform (4 customers, 4 regions) on a WireGuard hub-and-spoke architecture, fully automated via Ansible/SSM, CloudFormation, Aurora, Lambda, and CloudFront.
- Led migration of an edge intelligence platform from systemd to a 13-microservice HA K3s cluster, deployed across 50 units supporting 200+ concurrent isolated operators.
- Engineered a Helm umbrella/subchart architecture via FluxCD across 4 production sites (5 products/customer) with zero-touch per-unit provisioning.
- Built Bitbucket Pipelines CI/CD for containerized deployments, automating image builds and Helm subchart/chart version bumps across environments.
- Designed a custom monitoring and alerting system for event-driven edge devices, surfacing real-time health and failure signals across field-deployed units.
- Developing an "Organizational Brain" reasoning layer and multi-session Claude architecture for persistent, stateful institutional knowledge collaboration.

Developer Support Engineer | JFrog
Apr 2024 – Aug 2025

- Specialized in Kubernetes, Helm, and AWS deployments with Artifactory at the center of enterprise CI/CD pipelines.
- Resolved complex network and storage bottlenecks in mission-critical enterprise environments; maintained high resolution rates on escalated tickets.
- Led FinOps initiative using AWS Organizations and tagging - eliminated 80% of cloud waste, reducing monthly spend by 30%.
- Applied DevSecOps practices: JFrog Xray for automated vulnerability scanning and license compliance.

DevOps Trainee | Develeap Bootcamp
Jul 2023 – Jan 2024

900-hour intensive program covering Terraform, Ansible, CloudFormation, Python, Bash, Docker, Kubernetes, Jenkins, GitHub Actions, and AWS.

CERTIFICATIONS & EDUCATION

Certifications: Certified Kubernetes Administrator (CKA) · AWS Certified Solutions Architect – Associate · AWS Certified Cloud Practitioner

Education: Develeap DevOps Bootcamp (900 hrs) · CCNA Formal Training (100 hrs) · Master of Music, Jerusalem Music Academy · BA Music Education, Jerusalem Music Academy
